Transit Coordination Provided by **Newport Specialty Foods** -

The Tinkering Pan Company is in business servicing restaurants by restoring their aluminum fry/sauté/sauce pans by our innovative method. This method brings the pan back to its' original shape and refastens the handle and gives it new life.

A pan can be restored by our method over and over again without compromising its' cooking integrity, making it last for years. This can be accomplished at a fraction of the cost of a new aluminum restaurant pan.
